

Navigational cards

Navigational cards can be used to direct the user to another page or modal. All will apply a drop shadow with a default colour of HEX #000000, 6px Y-axis and 12px blur with an opacity of 15% as default unless specified otherwise, this should have the ability to be removed if needed.

Status card

This is a variation of the header card which includes a status colour block on the left of the card. The status card is used to signify task/items which are not started, in progress, incomplete or complete and the colour block to the left will reflect the relevant task status (please see colours style guide for status colours).

Filter cards

Filter cards can be used to better display key data sets or information that when selected will provide the user with a outcome or set of results.

Numerical filter card

Numerical filter card display a figure on left and text applying to that numerical value next to it. The coloured block on the left of the card can have a primary or a status colour (red, amber, green), the 'active' state outline needs to apply the same colour used on the left of the card.
