

# Cards

## Navigational cards

Navigational cards can be used to direct the user to another page or modal. All will apply a drop shadow with a default colour of HEX #000000, 6px Y-axis and 12px blur with an opacity of 15% as default unless specified otherwise, this should have the ability to be removed if needed.

## Filter cards

Filter cards can be used to better display key data sets or information that when selected will provide the user with a outcome or set of results.

### Numerical filter card

Numerical filter card display a figure on left and text applying to that numerical value next to it. The coloured block on the left of the card can have a primary or a status colour (red, amber, green), the 'active' state outline needs to apply the same colour used on the left of the card.
