

Allow users to navigate across the key views within the platform

presented in the navbar are key navigation items which display on desktop as a horizontal list, on tablet and mobile it appears collapsed into a list behind the menu icon. The list navigation items is appended with a button (usually primary) and can also include a compact button if

Our navigation bar provides users with consistent links to the main sections of the site or platform. The items

needed. On desktop this is positioned at the end of the list to stand out from the rest of the list, on tablet and mobile it is housed within the collapsed list behind the menu icon.

Mode examples

LIGHT MODE

This is an example of how cards can be displayed across light mode, dark mode, and high contrast mode

ACTIVE STATE

Lorem ipsum

SELECTED STATE

Lorem ipsum

Usage notes There should be no more than 6 navigation items (not including the button) in the navbar

IDLE STATE

Lorem ipsum

On tablet, all menu items are hidden behind the 'menu + hamburger), once activated the menu slides in from the right hand side and displays fully expanded at a width of 21.5rem (344px).

HOVER/FOCUS STATE

All menu items are hidden behind the hamburger menu on mobile, once activated the menu slides in from the right hand side and should occupy the full width and height on mobile device. This navbar can be stick or not depending on ruling - it will be none-sticky by default.
